## **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

The 103 rejection over Nichols et al. in view of Tabor et al. was overcome by Applicant's statement of common ownership at the time of the invention.

The claims are allowable over the cited prior art because the prior art does not teach, disclose nor make obvious the claimed method for treating a patient with Parkinson's disease resulting from a dopamine-related dysfunction, said method comprising the steps of: administering to the patient a full D1 agonist selected from the specific agents set forth in claim 2. Applicants amend claim 2, rewriting claim 2 in independent form, and amend claims 4-12 to correct the dependency of those claims following the canceling of claim 1. In addition, Applicants add new claims 13-15, depending from claim 2, and drawn to the embodiment where the agonist dose is reduced "at least twice every 24 hours to obtain second lower tissue concentration of agonist."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
